

PROPOSAL FOR REVIEW

Partner Mobile App, Dog Walking and Sales Executive App

This document covers the next phase of work on Tail Circle. We will turn the partner modules into a mobile app and add two new modules: Dog Walking and a Sales Executive app. For each one, it sets out what it does, who uses it and when it will be delivered. Please review it and send us any changes before we start.

01

CONVERSION

Partner Mobile App

All 8 partner (vendor) modules move from web dashboards to one mobile-first app for Android and iOS.

Days 1 – 8

02

NEW MODULE

Dog Walking

Partners bring their dog walkers onto Tail Circle. Pet parents book single walks or monthly walk plans.

Days 9 – 16

03

NEW APP

Sales Executive App

A separate app for the field sales team, covering duty in/out, live location, meeting recordings and conversions.

Days 17 – 22

20 – 25 days total

For all three pieces of work, counted from the day you approve this document. It includes final testing and app store submission (days 23 – 25). Everything already live on Tail Circle keeps working exactly as it does today.

01 Partner Mobile App

CONVERSION · 7 – 8 DAYS

All 8 partner modules are built and working today, but as web dashboards designed for a laptop screen. Most partners, from groomers and clinic staff to meal kitchens, run their business from a phone. We will redesign every partner screen for mobile first and deliver all of them in one app, **Tail Circle Partner**, on Android and iOS.

Grooming

Packages, time slots, bookings

Day Care

Plans, capacity, bookings

Veterinarian

Appointments, video consults, records

Shop

Products, stock, orders, returns

Events

Events, tickets, bookings

Last Ride

Memorial services, requests, team

Fresh Meals

Meal plans, subscriptions, delivery

Adoption

Pet listings, adoption applications

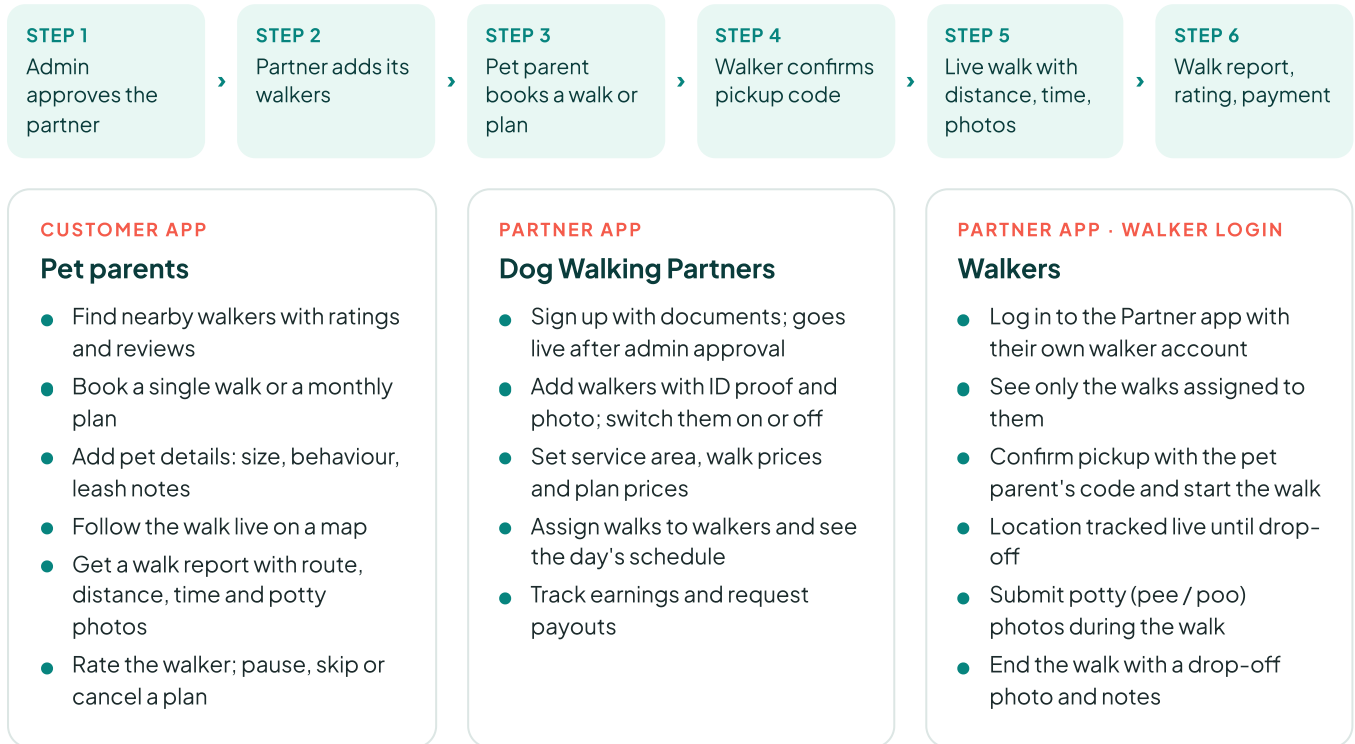

- **One app, one login.** A partner who runs more than one business, such as grooming and day care, switches between them inside the app.
- **Built for the phone.** Bottom navigation and large buttons. Cards replace wide tables, and long forms are split into short steps.
- **Instant alerts.** A push notification for every new booking, order or request, so partners can respond quickly.
- **Camera built in.** Partners take photos of services, products and documents with their phone and add them to listings and verification.
- **Same data as today.** Partner accounts, bookings, payouts, commissions and admin approvals work exactly as they do now.
- **Web panel stays.** Partners can still use the web dashboard on a laptop. Both show the same live data.

02 Dog Walking

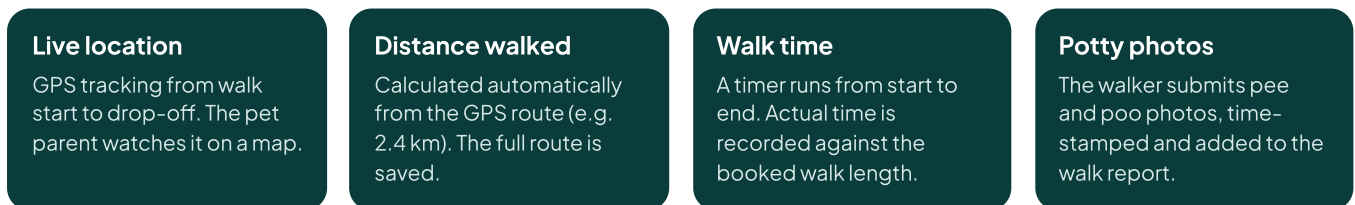

NEW MODULE

Dog Walking is a new service on Tail Circle. You onboard **Dog Walking Partners**, which are agencies or businesses that bring their own team of walkers. Pet parents book walks in the customer app. Each walker handles the walk from the Partner app, and the pet parent can follow the walk while it happens.

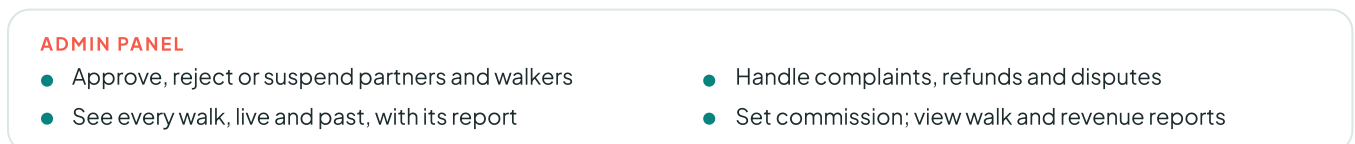

How a walk works

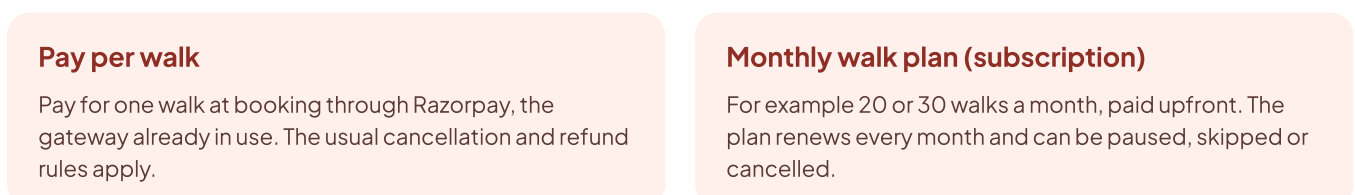

Walk tracking and proof of walk

The pet parent, the partner and the admin can all see the route, distance, time and photos for every walk.

Payment options for pet parents

With both options, the partner's earnings, minus Tail Circle's commission, go into the existing partner payout system.

03 Sales Executive App

NEW · SEPARATE APP

Tail Circle Sales is a separate app for your field sales team. It records when each executive starts and ends the day, where they go, the meetings they hold and which clients they convert. Managers see all of this in a new **Sales** section of the Tail Circle admin panel.

What the sales executive can do

Duty In / Duty Out

Start and end the working day with a selfie and the current location. Working hours are calculated automatically.

Live location on duty

Location is tracked only between Duty In and Duty Out. The route for each day is saved.

Meeting check-in

Check in and out at each client's location, which is confirmed by GPS. The app records how long every meeting took.

Meeting voice recording

Record the meeting through the phone's microphone. The recording is saved to the client's record and uploads automatically, even after the signal drops.

Clients & follow-ups

Add new leads with business details, photos and notes. Set follow-up dates and get reminders.

Conversions & targets

Move each lead through the stages until it converts. Executives see their own targets and results.

Lead stages

New lead > Contacted > Meeting done > Interested > **Converted** or Lost (with reason)

ADMIN PANEL · NEW SALES SECTION

What managers see

- Add sales executives and assign their areas and monthly targets
- A live map showing where every on-duty executive is
- An attendance report with Duty In and Duty Out times and hours worked
- Route history for each day, with every visit marked on the map
- Meeting recordings, playable from each client's record
- Conversion reports for each executive (leads, meetings, conversions and targets met), with Excel export

Good to know

- **Phone calls:** Android and iOS do not allow apps to record normal phone calls. The app records in-person meetings, and phone conversations can be logged as notes.
- **Consent:** the app shows a reminder before each recording. We recommend that executives tell the client the meeting is being recorded.
- **Location permission:** for tracking to work, executives must allow location access "all the time" and stay signed in during duty hours.

04 Delivery plan

20 – 25 DAYS

We will deliver the work in four phases, one after another. At the end of each phase we share a demo build so you can test it and give feedback while we move on to the next phase. The plan below shows the full 25 days. When a phase finishes early, we start the next one straight away, so we expect to finish closer to day 20.

Partner Mobile App 8 modules, mobile-first	Days 1 – 8																	
Dog Walking Customer app, Partner app and admin	Days 9 – 16																	
Sales Executive App New app and admin reports	Days 17 – 22																	
Testing & launch Full testing, fixes, store submission	23 – 25																	
	1			5		8	10				15	16			20	22		25

- Day 1 is the day you approve this document and share the items listed below.
- Google and Apple review each new app before it goes live. Their review usually takes a few days and is outside our control, so it is not counted in the 20 – 25 days.
- If you request a change after a phase has been signed off, we will confirm its effect on the timeline before starting it.

What we need from you

BEFORE WE START

- A Google Play developer account and an Apple Developer account, or access to your existing accounts
- Confirmation of the app names: "Tail Circle Partner" and "Tail Circle Sales"
- An app icon for each app, or approval for us to design them from the Tail Circle logo

DOG WALKING DECISIONS

- The walk lengths to offer (for example 30 and 60 minutes)
- Monthly plan sizes, for example 20 and 30 walks
- What happens to unused walks at month end: carried forward or expired
- The commission rate (this can also be set later in the admin panel)

SALES APP DECISIONS

- The list of sales executives to set up, with their areas
- Your lead stages, if they differ from the ones on page 3
- Monthly targets for each executive, if you want targets tracked

Next steps

- 1 Review this document and send us any changes or questions.
- 2 Approve the scope. The 20 – 25 days start from that date.
- 3 Share the accounts and decisions listed above so we can begin.
